

Statement for Anti-Reflective Coating

Leapton Solar as the PV Module manufacturer declares that:

Glass with anti-reflective coating is the standard for Leapton single glass modules with module type

LP182*182-M-54-MH/MB, LP182*182-M-60-MH/MB,

LP182*182-M-72-MH/MB, LP182*182-M-78-MH,

LP210*210-M-66-MH/MB, LP182*182-M-54-NH/NB,

LP182*182-M-60-NH/NB, LP182*182-M-72-NH/NB,

LP182*182-M-78-NH/NB, the anti-reflective coating is based on a unique nano-porous modified SiO₂ singlelayer structure, which provides a very low reflectance (range of reflectance) and a very high transmittance (range of transmittance)
